

Notes for Authors for the Journal of JSEM

Taro JIKKEN* and Jiro RIKIGAKU**

An example of the manuscript for the Journal of JSEM is shown. *****

Keywords: Experimental mechanics, Photoelasticity, Stress concentration, Optical engineering, Digital image processing, *****

1. Style, Margins and Fonts

- The title of the paper and the list of authors should be formatted to use the full width of the page. Abstracts and Key words should appear after the authors. The remainder of the paper should be formatted to appear as two columns, with a column width of 82 mm and 8 mm between columns.
- The paper size should be A4 or US letter. The document should be typed in an area of 172 mm x 247 mm.
- The preferred font is Times Roman. The font of section headings should be Helvetica or equivalent. The title should be 16-point type. The authors: 11pt. The section headings: 10pt. The text: 9pt.

2. Length

2.1 Limit of length

Length of the paper is limited to 8 pages for the Journal of JSEM, including text, illustrations and references.

3. Title

Type this information 2 lines down from top margin in 16-point type and center.

4. Authors

Type this information centered below the title.

5. Abstract and Key Words

Begin the abstract after the list of authors. Include a short abstract (maximum 200 words) consisting of a one-paragraph summary of the main points of the paper. Include 5 to 8 keywords after the abstract. All text should be single-spaced.

6. Photos and Drawings

- Photos and line drawings, clearly marked by figure numbers, should be reduced and positioned at the appropriate location within the text. Figures may occupy the full width of the page if necessary.
- Color photos and drawings are not accepted basically.

7. Equations

Equations must be allowed sufficient space to ensure clarity. Equations must be numbered consecutively, with the numbers parenthesized at the end of the corresponding line.

$$I = I_0 \sin^2 2(\alpha - \theta) \sin^2 \frac{\delta\pi}{\lambda} \quad (1)$$

8. References

- Use superscript notation to indicate the reference number in the text, for example¹⁾.
- References must be listed by number at the end of the paper.
- Do not list references which are not cited in the text.
- References should be prepared in the following general

format: author (last name, and initials), title of article, title of publication, volume and issue number, year of publication, page numbers. Font size is 8pt.
