

Vol. 12, Special Issue
July 2012

Journal of JSEM

The Japanese Society for Experimental Mechanics

Preface

H. TAKAHASHI, T. YOKOYAMA, G. MATSUI, M. IGUCHI and H. MATSUDA

— Contents —

Selected Papers from the 6th ISEM '11-Sendai/Kansai, 2011

Fluid and Thermal Engineering

Experimental Investigation and Numerical Computation of Fluid-Structure Interaction on a Square-Section Cylinder with Elastic Surface ·····	s1
Esmatullah Maiwand SHARIFY, Junnan LI, Hiroki SAITO, Shun TAKAHASHI and Norio ARAI	
Cold Model Study of Spout Eye Area in the Presence of the Slag Layer Simulated by Low-Density Particles ·····	s7
Asuka MARUYAMA and Manabu IGUCHI	
A Clarification of the Inactivation Mechanisms of Highly Effective Disinfection Treatment using Ultrasonically-Generated Ozone Microbubbles ·····	s11
Nonoko SYUKUYA and Toshinori MAKUTA	
Yield Improvement and Durability Enhancement of Hollow Microcapsules Fabricated by Bubble Template Method ·····	s17
Yukina TAMAKAWA and Toshinori MAKUTA	
Flow Past a Square Prism with Cut-Corners (Effect of the Angle of Attack) ·····	s23
Yoshiaki UEDA, Mitsuo KURATA, Teruhiko KIDA and Manabu IGUCHI	
Initial Unsteadiness Effect on Transition to Turbulence in Constant Acceleration Pipe Flow ·····	s29
Kazuyoshi NISHIHARA, Hisanori SAKA, Yoshiaki UEDA, Hirofumi OYABU and Manabu IGUCHI	
Integral Representation of Low-Reynolds-Number Hydrodynamics (Study of Stokes' Paradox) ·····	s34
Yoshiaki UEDA and Manabu IGUCHI	
Water Model Experiment on the Entrapment of Slag using Polymerization ·····	s40
Manabu IGUCHI, Yutaka SUMIDA, Koji MORI, Tatsuya OHMI, Yoshiaki UEDA and Keiji NAKAJIMA	
The Spatial Distribution of Ro/Vibrational Temperatures for Nitrogen Molecules behind Hypervelocity Shock Waves by CARS Measurement ·····	s46
Hima Bindu VENIGALLA, Shota NIINOMI, Masashi OGURO, Daiki SHIROTA, Masanori OTA and Kazuo MAENO	

Vibration Characteristics of Liquid Bridge between Sphere and a Solid Base subject to Vertical Vibration·····	s51
Seiichi SUDO, Shigeki INNAMI and Koji MATSUMOTO	
Heat Transfer Performance of a Self-Oscillating Heat Pipe using Pure Water as Working Fluid·····	s57
Dao Danh TUNG and Shuichi TORII	
Characteristics of Poorly-Wetted Two Spheres Penetrating into a Water Bath·····	s63
Yusuke SAKAI and Manabu IGUCHI	
Mixing Time of a Cylindrical Bath Agitated by Gas Injection through an Off-centered L-shaped Top Lance·····	s69
Norifumi KOCHI and Manabu IGUCHI	
Flow and Thermal Analysis of Ultraviolet-Curable Resin during Curing Process·····	s75
Ryo ODAGIRI, Hiroaki ISHIBASHI and Eisaku UMEZAKI	
Comparison of Pyrolysis/Steam Gasification Characteristics of Woody Biomass in a Fluidized Bed Gasifier with Triple-beds·····	s81
Takahiro MURAKAMI, Minoru ASAI and Yoshizo SUZUKI	
Quantitative Measurement of Natural Convection from Multiple Heat Sources using Color-Stripe Background Oriented Schlieren (CSBOS) CT Method·····	s86
Muhammad Falak ZEB, Masanori OTA and Kazuo MAENO	
Influences of Tube Length Sunk Underwater and Water Depth on Peaceful Sound of Water Musical Instrument·····	s92
Takashi TODAKA, Teruaki NAGASE, Yoichi NAKAZONO and Yoshito OHUCHI	
Magnetically-Driven Heat Transport Device using Ferrofluid·····	s99
Yuhiro IWAMOTO, Xiao-Dong NIU, Hiroshi YAMAGUCHI, Haruhiko YAMASAKI and Takuya KUWAHARA	
Spontaneous Dropping of Liquid Column in a Tilted Capillary Pipe with an Upper Lid·····	s105
Kenji KATOH and Tatsuro WAKIMOTO	
Suppression of Disintegration of Fan Liquid Sheet by Surfactant·····	s111
Tatsuro WAKIMOTO and Kenji KATOH	
Experimental Assessment on Gas/Liquid Transport Performance of Rotating Porous Disc·····	s116
Tetsuya YANO, Kiyohiro KATO and Seiichi SUDO	
Three-dimensional Visualization of Hydrogen Bubble Method by means of Digital Holography using Two-wavelength Reconstruction·····	s121
Yohsuke TANAKA and Shigeru MURATA	

Solid Mechanics

Dynamic Behavior of Circular Tubes Subjected to High Impact Loading·····	s127
Masahiro HIGUCHI, Yasuji HAMAGUCHI, Shun SUZUKI and Tadaharu ADACHI	
Energy Absorption of Thin-Walled Circular Tube Filled with Syntactic Epoxy Foam Subjected to Axial Compression·····	s133
Masahiro HIGUCHI, Takuma SAKA, Kenta FUJIMOTO and Tadaharu ADACHI	
Correlation of Stress Wave Velocity Transmitted Through Stem with Stem Structure of Miniature Tomato·····	s139
Kensuke KAGEYAMA and Toshikazu KURITA	

Effect of Aspect Ratio of the Elastic Body of a Flexible Sensor for Three-axis Measurement of Normal and Shearing Loads·····	s145
Noboru NAKAYAMA, Kang Ning TAN, Sung-Moo SONG, Hiroyuku TAKEISHI and Takuya SUZUKI	
Description of Anisotropy and Yield Differential Effects for AZ31 Mg Sheet using Cazacu 2004 Yield Criterion·····	s151
Mohammad Omar ANDAR, Toshihiko KUWABARA and Dirk STEGLICH	
Interference and Photoelastic Fringe Pattern Analysis using Snapshot Imaging Polarimetry···	s157
Satoru YONEYAMA, Shuichi ARIKAWA and Yuji KUGIYAMA	
Influence of Projectile Material Properties on Crater Size and Ejecta of Thick Aluminum Alloy 6061-T6 Targets in Hypervelocity Impact·····	s163
Masahiro NISHIDA, Shinji YAMAMOTO, Koichi HAYASHI and Sunao HASEGAWA	
Study on Evaluation of Soil Strength Parameters by using the Resistive Forces acting on an Excavating Blade·····	s170
Tomoaki SATOMI, Chen MIN and Hiroshi TAKAHASHI	
Effect of Rib Shape and Deformation Rate on Compressive Deformation Behavior in Expanded Polymer Rib Structures·····	s175
Hiroyuki YAMADA and Nagahisa OGASAWARA	
Redundant Control using a Magnetic Sensor and a Polarization Sensor without a Crossed-analyzer·····	s182
Yoshiyuki HIGASHI, Hiroaki TOKUAMI and Hiroshi KIMURA	
Application of an Acoustoelastic Stress Measurement System using Grazing SH-wave to Angle Steel Construction·····	s188
Yorinobu MURATA, Yoshihiko HASHIMOTO, Masami IKESHITA, Motoharu FUJIGAKI and Hiroki TODA	
Development of Shape Measurement System using Mirrors for Metallic Objects·····	s194
Motoharu FUJIGAKI, Shingo MATSUMOTO, Akihiro MASAYA, Yoshiharu MORIMOTO and Yorinobu MURATA	
Dynamic Property Evaluation of PLLA/PBSL Polymer Blends using Compressive and Tensile Split Hopkinson Bar Methods·····	s198
Seiya KUNO, Masahiro NISHIDA, Ikuyo KAWASHIMA, Tetsuo TAKAYAMA and Mitsugu TODO	
Fracture Prediction in Reinforced Concrete using Mechanoluminescent Sensor·····	s205
Chenshu LI, Chao-Nan XU, Daisuke ONO, Naohiro UENO and Yuichiro KAWABATA	

Materials and Processing

Carbon Reduction Rate of Phosphorus in Oxide Melt·····	s209
Hideki ONO, Kenichi KOBATA and Tateo USUI	
Structure Control of Cu-Zn Microchannel Lining Layers with Electrochemical Dissolution·····	s213
Kazuki KOBAYASHI, Tatsuya OHMI, Takehiko KUMAGAI, Masatoshi SAKAIRI and Manabu IGUCHI	
Liquid Immiscibility of Fe-Ag-Cu-B System·····	s217
Katsuhiko YAMAGUCHI, Hideki ONO, Shingo AGAWA and Tateo USUI	

Anodic Oxidation Behavior of Al-Zn Alloy Lining Layer Produced by a Sacrificial-Core Method·····	s222
Masashi ISHIDA, Tatsuya OHMI, Masatoshi SAKAIRI and Manabu IGUCHI	
Fabrication of Free-Form Channels by a Combined Process of Metal Injection Molding and Sacrificial-Core Method·····	s226
Yutaro SHITARA, Tatsuya OHMI, Takehiko KUMAGAI and Manabu IGUCHI	
Filtration of Ni-Al Alloy Containing By-Product Alumina in Centrifugal Combustion Synthesis·····	s232
Tatsuya OHMI and Manabu IGUCHI	
Composition and Structure Changes in Al ₃ Ni ₂ Microchannel Lining Layers by Alkali Leaching·····	s237
Yusuke SAITOH, Tatsuya OHMI, Masatoshi SAKAIRI, Takehiko KUMAGAI and Manabu IGUCHI	
Separation of Dy from Model Magnet Scraps using Molten Salt Electrochemical Process·····	s243
Hirokazu KONISHI, Hideki ONO, Tetsuo OISHI and Toshiyuki NOHIRA	

Bioengineering

Displacement Analysis of Living Human Teeth by X-ray CT Images and Coordinate Transformation·····	s249
Kazuo ARAKAWA	
Evaluation of Skills in Batting Technique in Baseball using Acceleration Sensors·····	s255
Satoru OKAMOTO	
Mechanical Testing of Bone Strength after Radiofrequency Ablation Treatment·····	s261
Yuichi ONO, Shuichi YAMAMOTO, Takahiro AKAO, Hisataka TANAKA and Toshio KAMINOU	
Finite Element Analysis of Movement of Lower Jaw Molars using Implant Anchor·····	s267
Yoshinori TOMIZUKA, Eisaku UMEZAKI, Shigeyuki MATSUI, Daigo KOMAZAWA and Naoto SUDA	
Wear Characteristics of Ultra High Molecular Weight Polyethylene (UHMWPE) in Cyclic Impingement Test·····	s273
Tomoya CHIBA, Yuta SHIMURA, Yuji TANABE and Hirotsugu OHASHI
